Equity in Infant and Early Childhood Mental Health Consultation Webinar Series

**Webinar 1: How Did We Get Here?**
An overview of the root causes of disparities in child outcomes, and the role of the child-serving systems.

April 30, 2020
12:30pm – 2:30pm ET

Use the Q&A feature to asks questions to the presenters. You may also chime in and answer questions that have been shared with the group!

If you are having audio issues with your computer internet connection, we advise that you call-in using a telephone. Use the Audio Settings feature to identify the call-in number for your local area.

A recording of the webinar will be posted on iecmhc.org and e-mailed to all registrants next week.
Welcome!

A multi-university initiative, housed at Arizona State University and led in partnership with experts at 15 universities and organizations across the country.

We work at the intersection of research-policy-practice.

Our mission is to close opportunity gaps and ensure that all children, regardless of race, ethnicity, income, home language, and/or ability, reach their full potential.

Equity in IECMHC Webinar Series

AGENDA

- Session Goals
- Setting the Stage: Historical and Institutional Racism
- Impact on Learning Climates
- Research to Practice - IECMHC Connection
- Where Do We Go from Here?
- Resources
- Wrap up

Today’s Session Goals

- **Build awareness** of issues of equity in early childhood settings, including the historical foundations of inequities, the presence of racial bias, and the resulting disparities.
- **Identify policies** that address inequities in early childhood and IECMHC systems.
- **Strengthen culturally responsive IECMHC practices** in order to reduce disparities and improve outcomes for children and families.
- **Provide resources and tools** to address equity, bias, and disparities through an IECMHC framework.
A Moment to Pause and Reflect

“To show that there is inequity, but not why there is inequity leaves too much open to interpretation. The reality is that we live in a racially structured society. That is what causes inequity”

– REI, The Groundwater Approach

How Did We Get Here?

Understanding the origins of structural racism
Structural Racism

Race is a social construct, a classification of human beings, that is politically defined.

Race is biological... FALSE

Race is a social construct, a classification of human beings, that is politically defined.
Race came before Racism... FALSE

Racism came first. Race is the child of racism.

Racism as a System of Advantage and Oppression

Racism = Social and Institutional Power + Race Prejudice.
Racism and the Construction of Race in the United States

- **Arrival of first enslaved Africans**: 1619
- **Bacon’s Rebellion**: 1676
- **Founding of the Nation**: 1776
- **Civil War and Reconstruction**: 1861-1877
- **Jim Crow**: 1865-1968

Three Observations of the Ground Water Metaphor

1. Racial inequity looks the same across systems.
2. Socioeconomic difference does not explain the racial inequity.
3. Inequities are caused by systems, regardless of people’s culture or behavior.

Observation #1: Racial inequity looks the same across systems

Figure 2: "African Americans are 1.5 to 7 times as likely to have a bad outcome across systems" (source in text on page 10).
African American COVID-19 Deaths

Tribal Community Data: AZ
Observation #2: Socioeconomic difference does not explain the racial inequity (cont.)

White single parents have approximately 2X the wealth of two-parent Black and Latinx households.

White college graduates have more than 7X the wealth of Black college graduates and 4X the wealth of Latinx graduates.

Source: Brookings Institute, 2019

Observation #3: Inequities are caused by systems, regardless of people’s culture or behavior.

“Health care providers’ diagnostic and treatment decisions, as well as their feelings about patients, are influenced by patients’ race or ethnicity and stereotypes associated with them.”

“African Americans and Latinos continue to be routinely denied conventional mortgage loans at rates far higher than their white counterparts.”

Institute of Medicine, (US) Committee on Understanding and Eliminating Racial and Ethnic Disparities in Health Care,

Glantz, A., Martinez E., 2018
Observation #3: Inequities are caused by systems, regardless of people’s culture or behavior.

Reverse racism exists....FALSE

Reverse racism does not exist.

The Lake Effect: Impact on Learning Climates
Implicit Bias

...the mental process that causes us to have negative feelings and attitudes about people based on characteristics like race, ethnicity, age and appearance.

Kirwan Institute for the Study of Race and Ethnicity.

Implicit Associations...

- Begin early and develop over a lifetime.
- Are experienced through exposure to direct and indirect messages.
- Can become internalized
- Are actualized at multiple levels: Individual (personal), Interpersonal, and Institutional (systemic)
Implicit Bias: It’s Learned Early...

What this looks like in Classrooms...

● Observation of Raphael
● She called his name 27 times in 7 minutes.
● Raphael was engaging the same behaviors as other children,
● She was teaching children how to treat Raphael!
What this looks like in Classrooms...

Hello Class, I am so sorry but I forgot this week is Spring Break. We will not have Zoom after all. Please continue reading your assigned book and we will Zoom next week.

Well that was a freaking waste of my time. I was looking forward to Zoom today.

Young lady, you don’t talk to me like this. It is very disrespectful. If you do it again you will not be allowed to participate in the next two Zoom sessions.

Implicit Bias POLL...

What do you think?
Figure 1: "African Americans are 1.5 to 7 times as likely to have a bad outcome across systems" (sources in text on page 6).
Let’s Start with an Analysis of Place Where Children Learn

- Some school zones are more segregated than neighborhood housing.
- Segregation is worse in communities with large demographic shifts.
- Early ed is more segregated than K-12

---

**Percentage of black students in the South who attend schools that are at least 50 percent white**

Data from the National Center for Education Statistics, via UCLA’s Civil Rights Project
From Place to Funding

- In 14 states, districts with the highest number of children of color, get less state/local funding than districts with the lowest number.

- Nationally, the highest poverty districts receive about $1,000 less per pupil in state and local funding than the lowest poverty districts.

Source: Orfield, G., Frankenberg, E., et al., 2014

From Funding to Quality

- Only 1% of Latino children and 4% of Black children in 26 states with state Pre-K systems were enrolled in a “high-quality” program.

- 14 million children in K-12 settings, disproportionately children of color, are in schools with police officers, but no counselors, nurses, psychologists or social workers.
In nearly every state in the country the suspension rates for Black children is at least twice as high as it was for White children.

Does anyone know the year this data was collected?

30 Years Later...

<table>

</tr>
<tr>
<td>48% Suspended multiple times</td>
<td></td>
</tr>
</tbody>
</table>

In Preschool

x 3.5

Higher rates than K-12

Similar racial disparities

Source: U.S. Department of Education Office for Civil Rights
160,000 + children were subject to corporal punishment in one school year.

1,500 of those cases were in Pre-K.

40,000 Black children were subject to corporal punishment in a single school year.

Black boys are 2X and Black girls are 3X as likely to be corporally punished as White children.

13% of AI/AN boys receive out of school suspension.

AI/AN children are less than 1% of K-12 enrollment, but make up 9% of corporal punishment cases.
Children with Disabilities

12% of enrollment:
- 71% of all children restrained
- 66% of all children secluded
- Are over-represented in corporal punishment, making up over 15% of cases.
- Are twice as likely to be excluded from K-12 settings.
- Data do not indicate that they are over-represented in exclusionary discipline in early childhood settings.

- More than half of all preschoolers with disabilities receive services in segregated settings.
- Children of color with disabilities are less likely to spend most of their day in a regular K-12 classrooms.
- Black and AI/AN children are underrepresented in early intervention.
- Latino preschoolers are underrepresented in preschool special education.
- Latino and Black children are overrepresented in K-12 special education.

Research Landscape
The Dehumanization of Black children

Adults perceive Black children as:
- 4.5 years older
- More aggressive
- Less innocent

(Goff, Jackson, Di Leone, Culotta & DiTomasso, 2014; Georgetown Law, Center on Poverty and Inequality, 2019)

Black children:
- Are more scrutinized by teachers for their behaviors than other children.
- Attribute negative behavior to the individual, as opposed to the situation
- Are punished more for subjective behaviors v. objective behaviors.
- Receive harsher punishment for the same behavior as White children.
• Teachers less likely to respond with empathy when there is no racial/ethnic match.
• Black and Latino students less likely to be excluded in schools with higher proportions of teachers of color.
• They are more likely to experience exclusionary discipline in schools with higher numbers of Black and Latino students.
• The 7 highest suspending schools in the U.S. have majority Black student bodies.

And it’s not just discipline...

➔ Play
➔ Praise
➔ Expectations
There is emerging evidence that ECMHC is a promising disrupter of bias and disparities.
The Practice of IECMHC

Central to the ECMHC theory of change is the focus on changes in adults’ knowledge, attitudes, and behaviors, in contrast with a focus on pathology within an individual child or family. (see Duran et al., 2009; Hunter et al., 2016)

Voices from the Field

Arizona’s Statewide Infant and Early Childhood Mental Health Consultation (IECMHC) intervention - Smart Support
IECMHC Closed the Gender and Racial Disparities Gap

Arizona’s statewide IECMHC intervention - Smart Support, was effective at ameliorating:

- **Gender** disparities for boys and
- **Racial** disparities for African American preschoolers

(Shivers et al., 2015)

</tbody>
</table>
Latest Findings: Consultative Alliance

Consultative Alliance predicted a positive change in the following outcomes:

- Attachment (boys of color)
- Lower negative classroom emotional environment
- Teacher-child closeness
- Teacher self-efficacy

Only when:

- Consultant shared the same ethnic heritage as teacher
  OR
- Consultant had ‘expertise’ in equity topics (cultural responsiveness, anti-bias education, undoing racism, etc.)

(Davis, Shivers, & Perry, 2018)
Why is IECMHC a promising disrupter of bias?

- ‘Leaning in’ with teachers
- Holding their gaze – ‘I see you’ (parallel process)
- Curiosity about the meaning of children’s behavior
- Self-awareness
- Presence in the here and now
- Perspective-taking
- Emotion-regulation
- Empathy which supports compassionate action

Multi-State IECMHC Workforce Equity Survey Findings

AZ n = 47
IL n = 85
MI n = 8
Let’s Take a Poll!

Do issues around race, culture, bias, etc. come up in your work as a mental health consultant?

- Yes: 92
- No: 20

Percentages
With whom are you most likely to encounter racial equity issues? (Mark all that apply.)

- With ECE administrators: 55%
- With teachers/providers: 71%
- With peers and colleagues: 48%
- With leadership in my organization: 25%
- With my supervisor: 25%
- With families: 69%

With whom do you talk/process when racialized issues come up in your work? (Mark all that apply)

- Other: 6%
- Outside support: 63%
- My supervisor: 38%
- Leadership: 39%
- Colleagues: 90%
- No one: 12%
Which topics/situations cause you the most dis-comfort/dysregulation at work?

Voices From the Field: Direct Quotes from Mental Health Consultants

“How do you implement a racial equity lens in your day-to-day work?”

“Please share examples of how you approach the racial equity discussions and work with those you serve.” (cont.)

“Interestingly, when this topic has come up with teachers, they are the ones that bring it up and not the other way around. Once it is brought to my attention and I see that they are comfortable with discussing it, then I just provide the support and holding space for it.”

“Remain vigilant in identifying and acting on opportunities to engage in equity discussions.”
“Please share examples of how you approach the racial equity discussions and work with those you serve.”

“Supporting ways to find a voice. Helping them see their experiences in the larger contexts related to systemic oppression. Validating. Honoring narratives.”

“I have discussed trends in preschool expulsions as an introductory topic to equity.”

“I try to plant seeds and allow the discussion to take root.”

Systemic themes in addressing racial equity

IECMHC issues we need to address
Emerging issues in IECMHC and equity

Reducing bias that often results in racialized discipline disparities:

- Workforce diversity.
- Workforce preparation and ongoing support.
- Supporting supervisors in holding space to talk about race.
- Building IECMHC organizational internal capacity to lead.
- Access to consultation:
  - Family, Friend and Neighbor child care providers
  - Marginalized families with immigrant and refugee status

Where do we go from here?
How Can IEMCHC Promote More Equitable ECE Systems?

Work with policymakers to create more equitable systems by:

- Raising awareness - context matters
- Advocating for and creating equitable policies
- Ensuring that all data are disaggregated by race/ethnicity, ability, language, and gender
- Ensuring that consultant preparation, training, and supervision incorporates and builds from equity - Including organizational transformation
- Build consultant toolbox to include the ability to talk about race and address inequity - from the relationship level to the systems level.
